

WHAT TREE SHOULD I PLANT IN MY LAWN?

PLANT THESE: ✓

Red Maple: Large, rounded, pollen-free tree, deciduous, easy to grow in lawns. Great fall color. 20-60' tall.

Honeylocust trees: A nice, medium-sized shade tree. Deciduous, grows well in lawns. 40-60' tall.

Variegated Box Elder: An attractive, smaller three-leafed maple tree, with beautiful variegated green and white leaves. 60' tall.

Fringe tree: Deep roots. Foliage is very attractive, deciduous, lightly fragrant bright color flowers. 20' tall.

Sourgum tree: A small to medium-sized tree, deciduous, excellent fall color. 35' tall.

Crabapple: A smaller, very pretty tree, with great flowers in spring and small red fruits in fall. 10-20' tall.

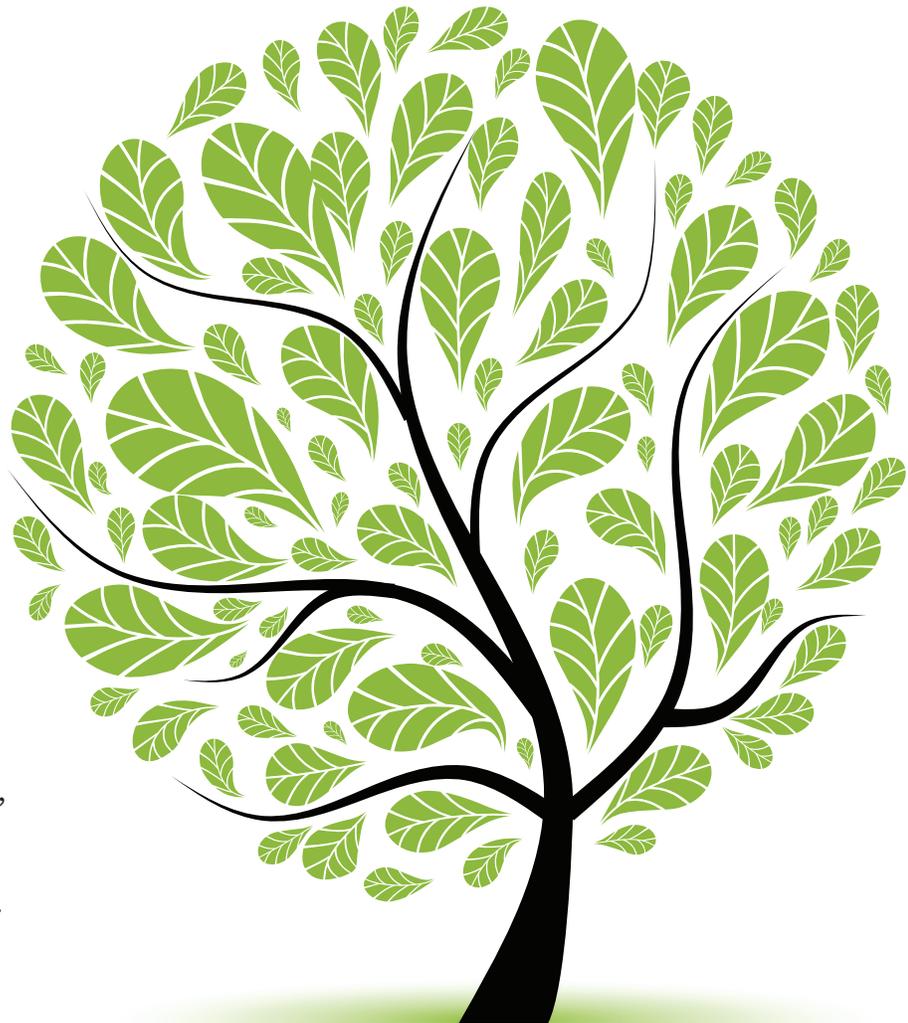

Flowering plum: A pretty, easy to grow tree, deciduous, flowers in the spring, grows fast. Shade is not dense. 15-30' tall.

Pineapple Guava tree: Small evergreen tree. Best grown as a multitrunked tree, gray-green attractive leaves, white-red flowers, sweet green fruit. With age the tree becomes more attractive. Interesting bark. 18-25' tall.

Apricot trees: Attractive, deciduous, easy to grow, blossoms smell great, and provides fruit. Good fall color.

Fuyu persimmon trees: Slow growing, very attractive bark and leaves, shade not dense, fruit is beautiful, sweet and excellent, tree is pollen-free. Incredible fall color. 15-20' tall.

Pomegranate tree: Makes a beautiful, small lawn tree. Deciduous, bright yellow fall color, shade not dense, attractive orange flowers and red fruit.

DON'T PLANT THESE: X

Fruitless mulberry trees: Roots are shallow and cause problems. Very allergenic. Shade is too deep for lawns.

Sweetgum trees: Roots are shallow and cause problems.

Pine trees: Roots are shallow and cause problems. Pollen is also an issue with these trees.

Sycamore trees: Usually grow way too large for most yards. Allergenic and many diseases. Very messy.

Magnolia trees: Roots are shallow. Shade is too dense too for most lawns. Messy.

Lombardy poplars: These common trees grow fast and die young, leaving you with a huge mess. Produce a lot of pollen. They also break easily.

Walnut trees: Nothing grows well under them and they produce lots of pollen. They also have smelly walnut fruit husks that draw flies.
